Serial No. : 09/737,158
Filed : December 14, 2000
Page : 2 of 4

Attorney's Docket No.: 10559-368001 / P10174

In the specification

Please replace the paragraph beginning on page 7, line 3 with the following amended paragraph:

A1 --A device driver **22a** can learn enough about its operating environment to automatically select a persistency status that ~~[it]~~ is appropriate for that environment. By doing so, the device driver **22a** relieves system maintenance personnel from having to manually configure persistency status and reduces the possibility of error in doing so.--

Please replace the paragraph beginning on page 11, line 19 with the following new paragraph:

A2 --The example illustrates how a device-driver may adaptively switch between operating in persistent mode and operating in non-persistent mode as circumstances require. It does so by detecting the existence of an intermediate driver in memory.--
